RELEVANT EXPERIENCES

Stinablis Sdn Bhd

Project Engineer Intern

Jan. 2026 – Feb. 2026

Sarawak, Malaysia

Startup providing reverse engineering and additive manufacturing solutions for automotive clients across Malaysia.

- As Project Engineer Intern, I **led end-to-end reverse engineering workflows** from 3D scan to functional prototype.
 - Restored availability** of a discontinued **1997 Mercedes-Benz W202 brake light housing**, delivering functional replacements for 5+ vehicles.
 - Improved durability by replacing the housing's brittle clip mechanism with **screws mechanism**.
 - Integrated modern **LED modules** while preserving OEM mounting interfaces.
 - Produced commemorative mementos for prominent startup programs, including **Sarawak SaaS Accelerator** and **DIVA**.
- Tech Stack:** Creality Raptor 3D Scanner, Mesh Processing, CAD Modelling, Bambu Lab Additive Manufacturing

Monash Automation

Mechanical & Electrical Project Engineer

Apr. 2025 – Present

Melbourne, Australia

Student-led engineering team at Monash University specialising in **robotics, automation, AI**, and **smart systems**.

- As Mechanical & Electrical Project Engineer, I work across robotics, smart sensing, and AI-enabled control.
 - Collaborated on the mechanical reskinning and AI-enabled voice-command integration of a **Unitree Go1** robotic dog.
 - Currently developing an **AI microscope** for **microplastic** detection with automated X–Y scanning platform.
 - Currently contributing to a **WiFi-based patient vital sensing** project for heart rate and respiratory monitoring.
- Tech Stack:** Python, Raspberry Pi 4, ESP32, Mechanical CAD Modelling, Computer Vision and WiFi Sensing

Shell Eco-Marathon Team Monash

Treasurer & Electrical Technician

Feb. 2024 – Jun. 2025

Kuala Lumpur, Malaysia

Multidisciplinary student engineering team competing globally to design **ultra-energy-efficient vehicles**.

- As Treasurer & Electrical Technician, I managed **SEM Team Monash's RM70,000+** budget, ensuring accurate financial tracking for international competition (**Lombok, Indonesia**).
 - Oversaw finance transactions and expense approvals for team operations, coordinating with **Monash Finance**.
 - Applied **PID control system** for vacuum former, maintaining $\pm 1^{\circ}\text{C}$ temperature stability and producing competition-qualified windshields.
- Tech Stack:** PID Control, Electrical System Integration, Laser Cutting, Manual Machining, Budget Management

Ministry of Youth and Sports of Malaysia

MyVaccination Frontline Volunteer

Feb. 2021 – Jul. 2021

Sarawak, Malaysia

- Assisted doctors & nurses in vaccination operations during the **national COVID-19 rollout**, helping **5,000+ patients daily**.

EDUCATION

Monash University – Clayton, Australia

Feb. 2023 – Present

Bachelor of Engineering (Honours)

Major: Robotic and Mechatronics Engineering | **Minor:** Artificial Intelligent in Engineering

CGPA: 3.83 / 4.0 | **WAM:** 85.64 / 100 | **Award:** Dean's List (2023, 2024, 2025)

CERTIFICATION, SKILLS & INTERESTS

- Certification:** SolidWorks CSWA
- Hard Skills:**
 - Programming & Control:** Python, C/C++, PLC Programming, Verilog (HDL), Matlab
 - Design & Manufacturing:** SolidWorks, NX-12 (CAD & CAM), Additive Manufacturing
 - Simulation & Analysis:** LTspice
- Soft Skills:** Leadership, Multidisciplinary Collaboration, Adaptability, Critical Thinking, Time & Budget Management
- Languages:** English, Mandarin, Bahasa Malaysia, Bahasa Iban
- Interests:** Rock Climbing, Hiking, Jungle Trekking, Reading Novels, Baking, Cooking
